### Product Failure Report

Units within warranty will be repaired for free, unless they have been misused. Units out of warranty will be repaired at a fixed price, unless we consider the repair uneconomic. Whether the unit is in warranty or not, there will be a charge if no fault can be found with the unit. Carriage will be charged in addition at our standard rates.

**Please note that there might be a charge of units if units are returned without a fault description or if no fault is found.**

Who should we contact to find out more information about the failure?	Name: Company: Telephone number: Email address:
RMA number issued by Gardasoft Vision	
Non-warranty repairs and if no fault found.	Please sign here to show that you agree to the charging policy given below:
Date	
Product type	
Serial number	
What is wrong with the unit?	
How/when did the failure occur? On delivery of the product? During experimentation/research? During normal operation?	
Was there an unusual event which caused the failure? Has the unit been wrongly used in any way? Has the unit been used outside its specification?	
What parameters were set? For example, continuous/pulse/selected mode, output current, pulse delay, pulse width, supply voltage, voltage/current rating of lighting?	
Any other useful information about the failure? Is there anything that can be improved in the product or documentation?
